"Intensive Supervision Parole" releases began in FY13; this parole program includes "first time" youthful offenders who undergo intensive programs/oversight while institutionalized and while on parole supervision.

** Prior to FY05, all priors data based on manual entry of priors at intake; FY05 and after, priors data based on inmate's previous SCDC commitments and data entry of "all convictions" and "out-of-state commitments."

¹ Excludes Lifers, Death-Row & YOA's

² Include inmates to be released to Community Supervision under Truth-in-Sentencing, excludes Lifers, Death-Row and YOA's

³ Based on inmate self-reported information at intake

⁴ Substance Abuse Subtle Screening Inventory (SASSI) stopped being used in January 1997. Currently Texas Christian University Drug Dependency Screen (TCUDDS) is used.

⁵ To facilitate statistical reporting, SCDC determines a single "most serious offense" (MSO) for each inmate. Before August 2005, the offense with the longest sentence determined MSO. Effective August 2005, inmates' MSO is the offense with the highest severity level (i.e. offenses are classified between severity level 1 and 5, with 5 as the most severe). In cases where an inmate has multiple offenses at the same severity level, SCDC considers the category of each offense, where homicide offenses take precedence, followed by sex offenses and violent offenses. If multiple offenses exist within the same category, the offense with the longest sentence then determines MSO. Because of this definitional change, post-2005 MSO data cannot be compared to pre-2005 MSO data.
